Reference: **Airtrain Terminal at Jamaica Station**
Contract No. LRS-284.401

Subject: **HI-Lite Aluminum Fly Form**
SN: PTS/Hi-Lite 001

Gentlemen,

Perini/Tutor-Saliba was satisfied with the use of Hi-Lite's 'Fly Form' as the base for various temporary platform layouts on the referenced project.

The installation of this system was not a typical use, but we found the system easy to install and its adjustment and modification capabilities allowed us the flexibility to adapt to the numerous field conditions that occurred working in an active railroad station.

Hi-Lite's personnel provided us with all of the necessary technical support and drawings as well as on site support for erection of a platform mock up. They also responded to the daily field modification issues in an expeditious manner.

Very truly yours,
Perini Tutor-Saliba JV
