Re: Borgata Water Club

Dear Virag:

I would like to take this opportunity to thank you for your efforts and performance on our 40-story tower for the Borgata Water Club project in Atlantic City. Your 70' flying tables performed as promised, resulting in a safe and efficient shoring operation on a project that I trust was as successful for you as it was for Weatherby Construction.

Your engineering support was critical on this highly visible project and your timely response to our never ending requests for signed and sealed calculations was greatly appreciated. As you know, we were able to completely cycle 8000 sf of typical floor shoring in less than 2 hours and, on a project where the crane time was at a premium, this kind of speed impacted all other crane dependent tasks, allowing us to meet our contract schedule obligations.

These light weight aluminum tables were fantastic and I would be happy to be a reference for your firm if that is something you would like. Once again, thanks for your help and we look forward to working together again, hopefully soon.

Sincerely,

Richard T. Bischoff  
Vice President/General Manager
